

Resetting the Fire Alarm

In case of an alarm / siren in the condominium
when there is no fire – for instance smoke from cooking.
(the indicator on the reset box will blink red)

Press the reset button within 2 min.

Hold in 1 sec.

(the indicator will blink orange)

Ventilate!

If smoke in the living room/kitchen, you have 5 min to ventilate.

If smoke in the room, you have 2 min to ventilate.

Still smoke? Press the reset button one more time before the deadline expires (the indicator will blink green when smoke free).

The Fire Alarm will go off in the whole building when:

- The reset button has not been pressed within 2 min.
- The ventilation time has expired, not pressed the reset button again and there is still smoke.
- If there is smoke in the staircase.
- If the evacuation button (red fire alarm box) is pressed.

- See pamphlet on fire security for more information.
